Re: Roadwork on Island Estates Drive

On January 30, 2019 roadwork is scheduled to begin on Island Estates Drive to replace the speed bumps on either side of the Oak Tree Island, replacement will be in their current location. We have scheduled the repairs such that Islands Estates Drive will remain open throughout the day. However, there may be delays. If you can avoid Island Estates Drive, we ask that you please do so. If you must drive in this area, please drive slowly and cautiously as there will be workmen, heavy equipment and temporary lane closures on Islands Estates Drive throughout the day(s).

Road work should begin after 8:00 am and the work schedule can be affected by weather, equipment and asphalt availability. We estimate the work will take 1 to 2 days.

Pease allow yourself extra time when traveling through Islands Estates Drive until the roadwork is completed.
