

Hammocks at River Wilderness

Date: 12-14-2018

Subject: Pool Closed until Pool Upgrades have been completed

The state and county have mandated upgrades to commercial pools. It is necessary that we complete these upgrades in order to have the pool open. Upgrades are automatic delivery systems of the chemicals used in the pool water. It is the Board's intent to get these repairs completed as soon as possible.

General Reminder: In accordance with our pool protocol, the heater is turned off when the temperature day and night are not warm enough for the heater to warm the pool water. When the weather warms to a minimum of 75 in the light hours and 60 degrees over night the heater will be turned back on.

A closed pool sign will be posted when this situation occurs.

Happy Holidays!
