River Wilderness

Day 1 – Staging

I arrived on site today at 6:30 a.m. and met up with my employee to get my cart and stored it at the golf course with the permission of Pat Walsh from the Pro Shop. I also met with Joe Taylor over at the maintenance shed and he allowed us to store the milling machine and the Port O Potty in their yard!

I met with Grady from Superior at 7:45 a.m. and showed him both the staging area at the maintenance shed as well as the location off of Little Country Road. He decided for the first part of milling, staging at the maintenance shed would be best and once we finish Woodland Fern, we will then store the equipment off of Little Country Road. This will save hours on transporting back and forth!

The M.O.T. crew installed the “Gutter Buddies” in all the drains being affected by the milling and paving project. I am aware that we are scheduled to have beautiful weather and no rain however the gutter buddies are designed to prevent any debris from blowing in and clogging the drains, not just water runoff. They were finished with the installation by 11:15 a.m.

The milling machine arrived on site at 12:00 p.m. and everyone was off site by 1:00 p.m. We were hoping to get the Port O Potty today as well as the sweepers, but they were on another site and not expected here until after 5:00 p.m. I felt delivering tomorrow would be fine since the milling machine was here already.

I inspected the recent repair on Wilderness Blvd. East to determine its readiness for paving. We will be replacing the top 6" with a finer grain of base material and then heavily compacting the repair area. The repair will be ready before the milling equipment reaches this area.

I have had numerous emails and phone-calls from residents thinking they are being locked out forever and to clarify the easiest of the requests, no one will be on site on Saturday. We are not paying overtime for the plant to stay open and the residents will be free to come and go as they please.

I will be on site at 6:30 a.m. and will start the first piece of equipment at 7:00 a.m. To ease your mind.... this will be the easy part.

See you tomorrow!
